

Conditional co-movement collapses ($m = 1$) The mechanism: $\mathcal{R}$ becomes denominator-driven

—○— $\mathcal{R}$ (the ratio)

—△— numerator $\|X - X^T\|_F$ alone — the refuted repair (H1)

—□— $1/\|X + X^T\|_F$ (H2)

— — — marginal (unconditional) reference

..... median numerator

— · — median denominator
